## General Advice: After Grooming (Dog)

It's time to collect your dog after his/her appointment. Take a moment to admire your dog's 'finish'.

You're thrilled – please let your groomer and others know

Professional pet groomers, like anybody else, will appreciate hearing your positive feedback. Take it a step further and share a happy review online or on social media. This kind of support goes a long way to reinforcing high standards and levels of care among pet care professionals. Thank you in advance!

Monitor your dog's behaviour after grooming

Your dog should be leaving the salon full of glee and proud of his or her good looks – be sure to praise your dog for looking so good. As you'll know from your own experience, it might feel a bit strange or ticklish after a haircut. Your dog might get this same feeling and start to scratch. This needs to be avoided. If this happens, ask your BIGA groomer for their guidance.

If you are disappointed with anything, please say something to your groomer straight-away so they can make the changes or corrections there and then

*As a member of The British Isles Grooming Association, your BIGA groomer agrees to abide by our professional code of conduct. Animal health, safety and welfare is our number one priority. Regular grooming is beneficial to your pet's health and happiness and we encourage you to partner with your groomer in this noble endeavour.*
